# Natural Trendy accessories

Central vacuum systems

# Natural Accessories ...The peak of centralized vacuum systems

Quality details

To simplify use

Respecting the surfaces

Increase functionality

With a centralized vacuum cleaner you can get the best suction, with the new accessories you get the maximum efficiency.

For a healthy home!

# The best accessories for the best results

## NATURAL BRISTLES

The new **Natural Trendy brushes** by Sistem Air respect all surfaces, even the most delicate ones, guaranteeing **superior cleaning** and **long-lasting durability**.

## STOP MITES ALLERGENS

A more **effective cleaning** means reducing the proliferation of mites and other allergens, **improving the healthiness of environments**.

## HEALTHY ENVIRONMENTS

Healthier environments allow a **better quality of life in them** and **this particularly**, such as children and the elderly.

## DESIGN

The design of the new brushes is functional due to their simplicity of use: **specific shapes**, with **bumper profiles** and **joints** that facilitate **reaching the most hidden points**.

For even more effective cleaning.

# BEST USE, HARDWEARING

The attention that Sistem Air dedicates to all its products cannot be overlooked towards accessories: they represent the final element of the system, completing the **quality of the system** and contributing to increased **effectiveness of the cleaning** compared with

traditional portable vacuum cleaners. The **Natural Trendy** range is designed to make using the centralized vacuum system even more advantageous: these are brushes made using quality materials, with movements that **simplify everyday use**, making cleaning

faster and making it possible to safeguard objects and the surfaces with which they come into contact. Each brush offers deep **longer lasting, more easily achieved cleaning**: a small revolution that deserves the Sistem Air name.

# DOUBLE USE Brush With joint and bumpers

Delicate on carpets

Efficient on hard surfaces

**DUAL MOTION**

Natural double floor-carpet brush

**Art. 7736.0**

Thanks to the bristles mounted on the **retractable comb**, which can be operated with a simple press of the foot, this brush is suitable for use both on carpets (with bristles retracted) and on traditional floors (lowered bristles). The **rounded shape** and the generous **rubber bumper** edge prevent it from marking particularly delicate walls or furniture, while the chromed support surface facilitates sliding and gives it greater strength. The **double movement joint** makes it extremely easy to handle.

# PARQUET brush

With full-movable joint and felt

Low thickness, for the maximum ease of use

Natural parquet brush

Art. 7735.0

This parquet brush represents a real innovation: it has a **easy gliding surface** over the parquet, while the absence of the traditional felt front tape prevents dust from accumulating without being vacuumed. Additional features: no bristles, **180 ° folding joint** and **felt inserts for polishing the floor**.

# FLOOR Brush With joint and natural bristles

The soft bristles allow you to get deep into the floor joints.

Impeccable on smooth floors

 **DUAL MOTION**

30 cm Natural Floor brush

**Art. 7747.1**

The **softness of the bristles** and the **thickness of the comb** are the real strength of this brush, which caresses the surfaces, leaving no escape for dust. The **side wheels** lighten its glide, while the **rear roller** prevents the bristles from bending and reducing their effectiveness over time. The **dual movement joint** allows access anywhere.

# MATTRESS Brush *With joint and velvet*

Ideal for sofas and upholstery

Perfect adherence on curved surfaces

Natural mattress brush and upholstery

Art. 7744.0

The **large**, adjustable comb is **completely covered with velvet**, ensuring the maximum efficiency of this brush, able to best express the suction power of the Sistem Air power units.

# DUSTING Brush With natural bristles

It reaches everywhere with the utmost precision

Light and manageable on furniture

## Dusting brush with bristles Natural Art. 7743.0

Again, this brush comes from the idea of creating an accessory that is **delicate on furniture surfaces**, where it is mainly used, and able to reach every corner, thanks to the **triangle shape**. The **amplitude of the suction mouth** delivers an optimum flow of air, for a better suction performance, and reduces the phenomenon of bending of the bristles, which would reduce effectiveness of the brush itself.

# Nozzle for corners Gets everywhere

Gets into gaps, cavities and the most difficult places

MAXI SIZE:  
35 cm!

Natural Nozzle for corners

Art. 7745.0

The new nozzle for corners can reach the most hidden points of the house: behind furniture, in crevices, bookcases, etc.

The **wider than normal suction mouth greater** allows better suction power, increasing the effectiveness of the cleaning just where it is more difficult to get into with the vacuum cleaner.

Better reach

# CLOTHES Brush

With natural bristles

Delicate on fabrics

## Natural brush with bristles

Art. 7742.0

This clothes brush, thanks to the **natural bristles** and **velvet bottom**, removes dust, mites, fibers and allergens which get deposited on clothes surfaces . An extremely important operation, which can't be done with traditional vacuum cleaners, but is **extremely effective** when done **with the centralized system**.

# RADIATOR Brush Reaches anywhere

Eliminates dust from radiator elements

Natural radiator brush

Art. 7746.0

**Combined with the corner nozzle**, it allows the extraction of dust that settles between the elements of **radiators and designer home radiators**.

An operation which, conducted regularly, significantly increases the **healthiness of the rooms**, because it cleans up the heating surfaces that create air circulation.

### Ash vacuum separator

It is connected to the suction system and allows the ashes to be kept cold, preventing them from entering the plant piping. It is made of **stainless steel** and has **wheels** for easy handling.

Inside there is a **fireproof fabric** filter, which offers a wide filtering surface and reduces maintenance requirements.

It is supplied with a system connection pipe clip. It is advisable to use a tube dedicated to the ash suction.

Art. 7033.7

### Liquid separator

Allows the suction of liquids in absolute safety, thanks to the **float**, that once the container is filled (21 L capacity), blocks the suction flow, preventing liquids from reaching the system pipes. It is made of plastic and comes complete with a **brush with rubber spatulas**. Thanks to the **wheels** it can be transported easily. Also in this case it is supplied with pipe connector for the system connection, and it is advisable to use a tube dedicated to the suction of liquids.

Art. 7033.0

# TO COMPLETE CLEANING

# Flisy: wireless ON / OFF system

It allows the comfort of the ON / OFF command without having electric wires running along the pipe.

Thanks to this feature Flisy is a unique product of Sistem Air, and it is:

## INTEGRATED

extra-thin compact design

## ENDLESS

always works, even with low battery

## ULTRALIGHT

compared to the previous generation

Electronica garantita a vita

Wireless

With **Flisy** turn on and off, your central vacuum cleaner becomes **comfortable and practical**. There is no need to go to the suction socket: **the central vacuum unit is controlled by the button on the handle**, with assured signal reception and the safety of the impossibility of an accidental start of the system.
